FOR THE FASHION & GARMENT INDUSTRY

Oriental Logistics provides ongoing specialized garment warehousing and distribution services in major regional distribution hubs in Hong Kong, Shanghai, Beijing and Taiwan.

Oriental Logistics provides accurate inventory management for fashion garments and accessories in a fast paced industry.

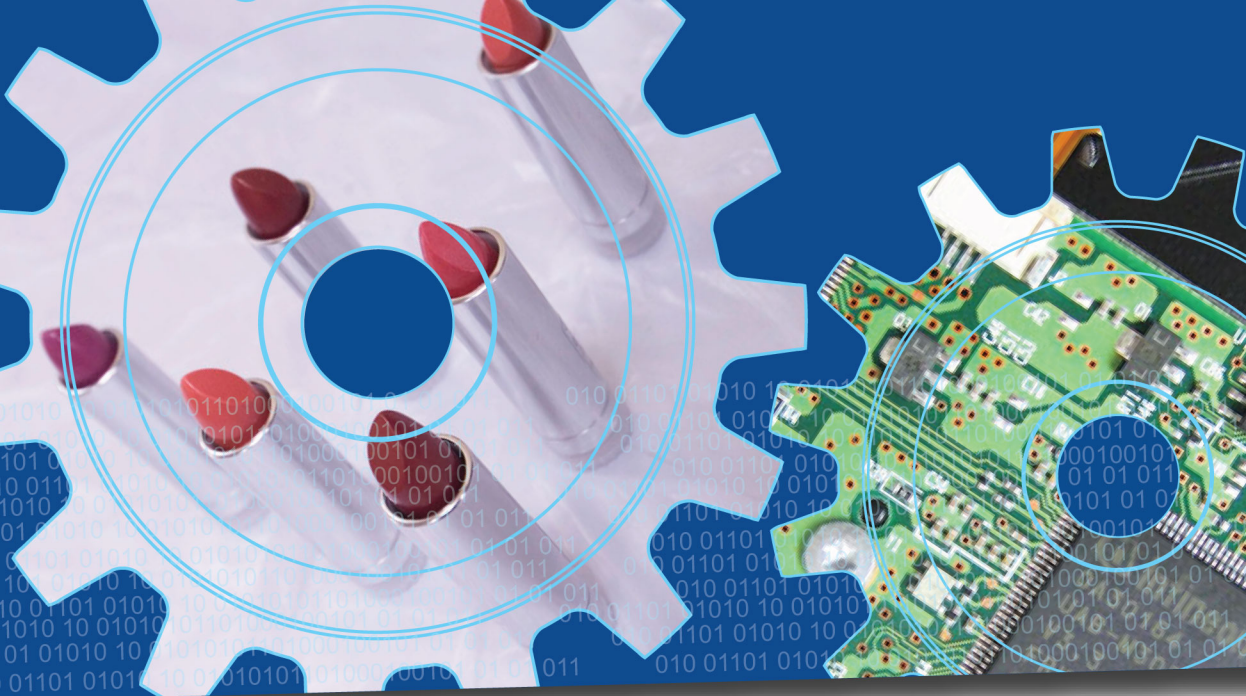

We provide delicate and professional processing, and handling of fashion garments in a temperature, humidity and dust-controlled environment.

A well-trained and experienced team of loading bay workers and garment handlers are employed to handle receipt, warehouse processing, and un/loading of garments. Each team of workers is specially trained and experienced to handle customers' specific workflow requirements.

The following specialized services are provided for the handling of garments and accessories, and all operations are monitored and governed by our advanced Enterprise Resources Planning (ERP) Computer Software and Warehouse Management System.

- Accurate 'Pick and Pack' operations and professional storage of garments by hanger-on-garments or by flat-pack in specialized garment bays.
- Price label and security label tagging, barcode labeling and re-labeling services.
- Skillful garment re-bagging, repacking and garment hanging services.
- Various quality control and inspection services available.
- Reverse garment logistics and reprocessing of returned garments, as well as merchandise swaps between stores.
- Accurate and professional sorting of: styles, sizes and colours of garments, as well as fashion accessories.
- Handling of daily replenishment orders and daily distribution to stores.
- Advanced in-house web-based information system enables our customers to access 24/7 a wide range of real-time reports and charts concerning inventory, delivery, and shipments.
- Our in-house programmers are well accustomed and experienced in establishing EDI links between our customers' SAP or warehouse management systems, and our own ERP system.
- The use of wireless barcode scanners and barcode inventory management systems, ensures accuracy in pick and pack operations, which are all processed by our advanced logistics ERP system.

HEALTHCARE & COSMETIC PRODUCTS

We have secure, clean and hygienic, climate-controlled areas at our facilities to ensure cosmetics and health care products are stored in the best possible conditions. Our transportation teams deliver all products safely and professionally to all store locations, as well as ensuring the shelf life of products and essential properties are maintained.

Oriental Logistics' in-house advanced Enterprise Resources Planning system (ERP) operates on a FIFO inventory management system, and the product expiry dates ensure product-life is monitored, and any expired stock can be easily tracked and returned to the vendor.

Various re-labeling and repackaging options are available to ensure product packaging and essential instructions meet the requirements of local and international markets.

ELECTRONIC COMPONENTS & ELECTRONIC PRODUCTS

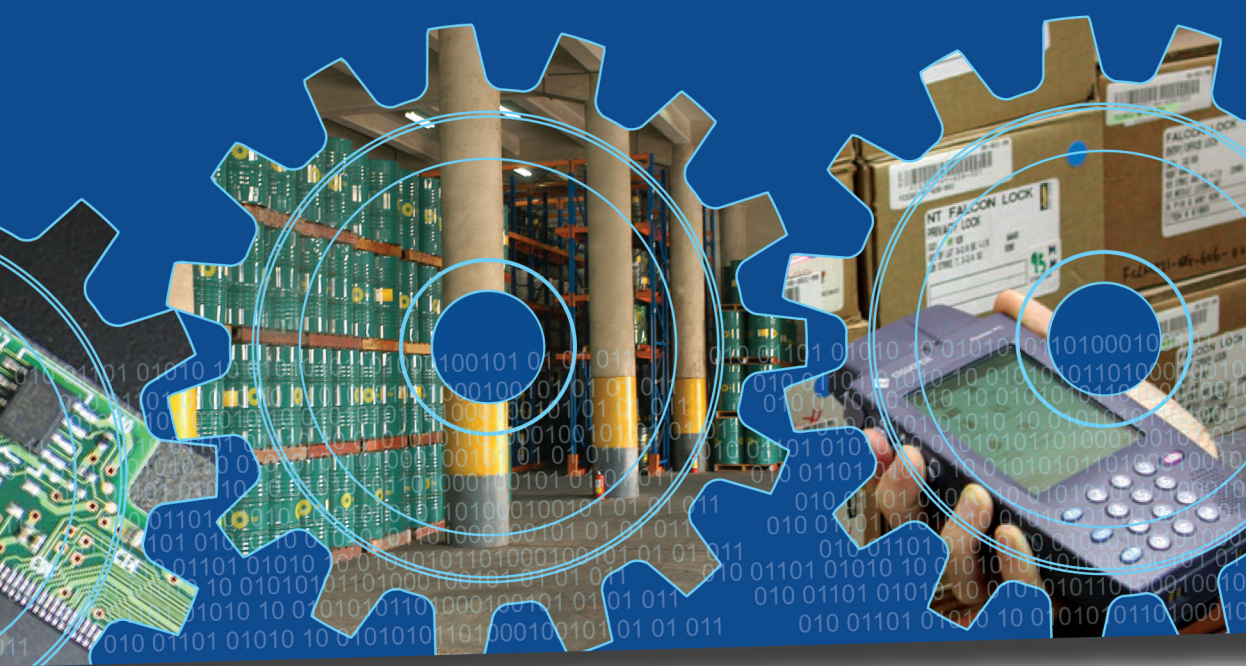

Electronics and computer related items require professional careful handling, and secure storage areas. We have various alarmed, sealed and climate-controlled areas that are well suited for storage of delicate electronic items and components.

Security is our prime concern and CCTV is installed throughout our premises. A Smart-card system for door entrance is provided for each area of access. We also have reputable insurers to help safeguard against any financial risks.

Our Pick and Pack mode of operations using barcode scanners and barcode inventory management systems ensures accuracy.

Professionally trained Oriental Logistics' warehouse and transportation teams provide efficient, secure and safe distribution of cargo from receipt to delivery.

INDUSTRIAL CHEMICALS & CHEMICAL LOGISTICS

From its conception and start of operations, Oriental Logistics has been a leader in chemical logistics and it continues to serve major brand names in the chemical industry. Oriental Logistics provides a one-stop solution to its customers for warehousing, cross-border transportation, warehousing, local distribution and freight forwarding services via sea or air. These services are backed up by advanced computer technology and software which provides 24/7 web-based inventory records and reports that are downloadable in various formats.

Oriental Logistics has the prerequisite licenses and expertise required to handle hazardous and non-hazardous chemicals and goods. We pride ourselves on providing a professional and safe working environment when handling, transporting and storing hazardous, and non-hazardous chemicals and goods.

Oriental Logistics advanced warehouse management system has won numerous awards. We exceed customers' expectations and performance measures, and this is reflected in our awards and customers' referral letters. Oriental Logistics prepares detailed workflows and planning for all our customers to ensure smooth handling, delivery and storage of both hazardous and non-hazardous chemicals, as well as other goods.

Oriental Logistics is proud to be a 'Responsible Care Group Member' for chemicals.

WAREHOUSING & VALUE ADDED SERVICES

We have several warehousing operations in Hong Kong, Shenzhen, Guangzhou, Beijing, Shanghai and Taiwan. A modern, efficient, well-maintained warehouse is a must for any brand and quality conscious customer. At Oriental Logistics we take pride in warehouse management, and we aim to provide defect-free inventory management to our customers.

Our warehouses have modern facilities: air-conditioning, Epoxy floor-coating, fiber optics cabling throughout, modern fire fighting equipment and systems, racking, and garment hanging bays.

We employ and train experienced personnel to carry out the Pick and Pack operations according to specific requirements of our customers. At the same time, we utilize a host of value-added services such as: price label and security label tagging, barcode labeling and re-labeling, skillful garment re-bagging, repacking or garment hanging, and various quality control and inspection services.

ADVANCED I.T. SYSTEMS & SYSTEMS INTERGRATION

Our advanced in-house written software provides 24/7 real time inventory data and reports via our web-portal. Our web information systems provide logistics managers with 24/7, accurate data on demand in various reporting formats. These can be downloaded for easy manipulation and preparation of reports.

A web-based e-ordering system can be accessed via the web for ease of ordering and urgent order placement for next day store replenishment.

Our team of IT professionals can help to ensure smooth linkage and data exchange between our customers' SAP system and our advanced Enterprise Resources Planning (ERP) logistics specific, tailor made program.

FREIGHT SERVICES AND YANTIAN CARGO CONSOLIDATION SERVICES

Professional freight services, combined with Oriental Logistics' strong network of agents and partners around the globe, make Oriental Logistics the right choice for your every need concerning freight forwarding and customs document services. We provide cost-efficient and reliable freight forwarding service for our customers spanning Asia, Europe, North & South America and the world.

We are extremely experienced in consolidation and forwarding by air, sea or land, for FMCG products, general cargo, chemicals and dangerous goods handling. Oriental Logistics holds various licenses for specialized freight forwarding and transportation services.

We have various modern and pristine warehouse facilities in Hong Kong, Guangzhou, Shanghai, Taiwan and Shenzhen (Yantian Container Terminal). We offer Bonded and CFS warehousing facilities providing value-added, customs, and repacking services for multi-country consolidation and/or for buyer's consolidation. Our services provide exporters and importers with more options for their customers.

Our one-stop service offers a full range of import/export services, including L/C documentation processing, customs clearance handling, and various other value-added services.

ORDER FULFILLMENT / DAILY ORDER REPLENISHMENT

Replenishment orders will be sent via e-ordering or Electronic Data Interchange (EDI) into Oriental Logistics' custom made Enterprise Resources Planning system (ERP). All delivery orders will be promptly and professionally processed. Seamlessly, on-time deliveries will be made to retailers and wholesalers and our customers can access real time information via our web portal, as Oriental Logistics' transportation teams make deliveries.

Oriental Logistics prides itself on its professional services, and all Oriental Logistics' delivery staff and warehouse teams are dressed in full company uniform and always handle deliveries in a professional manner, thus ensuring the right image is projected to your customers and to protect your brand image to the public.
